

Marine **FUELCURE**[®]

165ml tin

1 x 165ml tin will treat 75 litres of petrol.
1 X 330ml tin will treat 150 litres of petrol.

Characteristics

FuelCure conforms to all known fuel specifications.

FuelCure is manufactured from non-petroleum chemicals and does not use Octane boosters to enhance performance. FuelCure eliminates water contamination in the fuel and prevents phase separation which occurs in Ethanol blended fuels due to its hygroscopic properties.

EPA (Environmental Protection Agency) registered.

Available in various package sizes:
165ml – 220 litre drums

Suitable for all types of Gasoline, Race Fuels and E10 – E20 Ethanol Fuel Blends.

For use in all Personal watercraft, Small motorboats, Gasoline storage tanks, and ideal for wintering your boat.

BENEFITS:

- Each 165ml tin treats 75 – 150 litres of petrol
- Prevents phase separation in Ethanol blends
- Maintains fuel quality during lengthy storage
- Makes water content in fuel combustible
- Reduces Downtime & Filter Replacement
- Reduces Harmful Carbon Emissions
- Improves Combustion & Performance
- Improves Cold Starts and Idling
- Cleans and protects the engine
- Reduces Fuel Consumption
- Ideal for use in extreme cold temperature
- Prolongs engine and fuel system life

Treatment with Petrex FuelCure will:

- Remove ALL water contamination in fuel
- Neutralize all acid build up
- Dissolve all resin and waxing
- Restore your fuel system to original state
- Improve performance and save fuel
